

SuPr

A national node for sustainable production

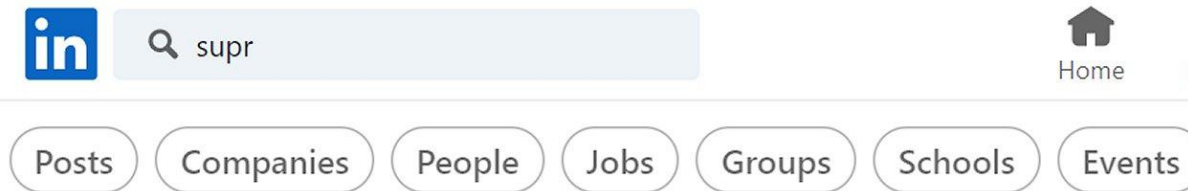

SuPr combine leading R&D actors and companies within Sustainable Production.

We work together to initiate and implement new sustainable solutions within Swedish manufacturing industry.

Examples of existing research and development partnerships within SuPr

This is how we like SuPr to work ..

SuPr

The Swedish Research
and Innovation node for
Sustainable Production

Today's programme ..

Transition towards a sustainable manufacturing industry

Session leader: Mats Lundin, SuPr

The Circular Car

Emma Enebog, RISE

Competence transition for a sustainable industry, lessons learned and inspirational examples

Sasha Shahbazi, Södertälje Science Park, Cecilia Schülén, and Mathilda Nordell, EDAG Engineering Scandinavia AB

Workshop:

Influence the Circularity missions of next generation Innovation Programs

Melinda From and Boel Wadman, RISE and Mats Lundin, SuPr

Key factors in order to realise a circular product life cycle will be described. This by using a holistic approach and involvement of actors from different parts of the value chain (*design, manufacturing, use and recycling*)

An educational and coaching approach will be presented, aiming to increase sustainability competence within SME's. Concluding remarks by participating companies about their sustainability journey will also be made.
