Save the date to Production Cluster's annual Conference on May 6-7, 2020 in Katrineholm!

Book already now the meeting place for production technology in Sweden, May 6-7

Here the latest research results are presented from current production engineering projects, all important elements for strengthening Sweden's continued success as an industrial nation. We look forward to a very well-attended event!

Our vision is to develop economically and environmentally sustainable manufacturing systems that are capable of effectively supplying the market with innovative products of the future. For this purpose, the Swedish automotive industry has initiated a structure for coordination of research and development - The Swedish Manufacturing R&D Clusters.

The conference is organized by the production clusters together with leading R&D organizations in Sweden. Main organizers are the automotive industry in Sweden in collaboration with the Vehicle Components Group, RISE, Production2030 and FFI Sustainable Production

We look forward to meeting you in Katrineholm!
